

## GENERAL MEETING HELD ON THE 11 / 3 / 98

The meeting was opened at 8-10 p.m. by President George Holman with 29 members present.

Apologies were received from: Leonie Freeman, Morris Kolman, Julie Morgan, and Basil Marsh.

1 visitor. Vernon O'Silva, made welcome to the meeting.

New Member, Brenton Stiford was presented with his club badge.

Minutes of the last general meeting were read and accepted.

Minutes of the last committee meeting were read and accepted. Moved Jim Strong, 2<sup>nd</sup> Basil Marsh. Carried.

Inward correspondence:- A.A.A. meeting minutes and financial statement. Brochure from Fisheries Dept.

Correspondence out:- Letter sent to Barry Diamond at DOLA re: Moore River camping enquires.

Treasurer's report:- Read out and accepted. Moved Jim Strong, 2<sup>nd</sup> Derry Barber that the bills for club shirts and caps - \$280.00, field-day books - \$205.74 and ????? \$86.40, be passed for payment. Carried.

Field-day officer's report:- 32 people attended the March / Bluff Creek field-day. Members voted to move the April field-day back 1 week due to falling over the Easter break. April field-day is Cape to Cape. Boundaries to be decided on the day, subject to prevailing weather conditions. Moved Ian Cook, 2<sup>nd</sup> Darren Batchelor that Steve Sutton and Heath Holman be made Special Members<sup>1</sup> to the Surf Casters so they would be able to participate in the coming boat fishing competition on the 21/3/98. Steve and Heath are using their boats for the benefit of the club members. Carried. Competition rules state that the skipper of the boat must be a member of the club competing in the boat fishing competition. State Estuary Competition over Easter. All participants are asked to attend a meeting at Ian Cook's house on the 1/4/98 (See front page for address).

Dry Casting officer's report: A discussion on the dry casting lane size (A.A.A. Vs S.C.A.C.) resulted in the members present opting to retain the S.C.A.C. lane size as is currently being used. Moved Roy Killick, 2<sup>nd</sup> Derry Barber that the Surf Casters lane size be used. Carried. Bob Henderson is to resume the roll of Assistant D.C.O. in April if David Renton has not contacted the committee, regarding his absence from committee meetings & dry casting<sup>2</sup>.

Social organiser: Night cast on 14/3/98. Mystery bus tour on the 8/5/98. Watch for details in the Reel Talk.

Notices of Motion: 4 Notices of Motion were received and all will be published, in full, in the next Reel Talk.

- |                          |                      |                                   |
|--------------------------|----------------------|-----------------------------------|
| 1) Undersized fish       | Moved George Holman. | 2 <sup>nd</sup> Hans Wyttenburg.  |
| 2) Mutilated fish        | Moved George Holman. | 2 <sup>nd</sup> Darren Batchelor. |
| 3) Species badge         | Moved Dave Maxted.   | 2 <sup>nd</sup> Wayne Morris.     |
| 4) Dry casting line type | Moved Bob Henderson. | 2 <sup>nd</sup> Ian Cook.         |

Instruction period:- "YOUR favourite beach rig"!!!! Members are asked to bring along a rig so we can all see the various types of rigs that members use and discuss the good / bad points relevant to each rig.

General Business:- Jim Strong and George Holman advised that the following members have family who are not in good health at the moment: Eric Parker - Mother, Andy Thorgerson - Wife, Phil Brayne - Father, Basil Marsh - Self. The Surf Casting and Angling Club wish them all a speedy recovery.

Members please note: It is your responsibility to ensure that your name is marked off when attending the meeting so attendance points can be allocated. **NO NAME - NO POINTS.**

The meeting closed at 10-05 p.m.

<sup>1</sup> Extract from the Constitution of the Surf Casting & Angling Club of WA (inc) clause 3c:  
SPECIAL MEMBERS - Special members shall be defined as being eligible members, with no voting rights, to participate in a nominated activity or activities. A nomination fee as fixed from time to time by the Committee shall be paid. The duration of special membership shall be for the period of the activity. Acceptance or rejection of the nomination shall be by the President and one other committee member.

<sup>2</sup> Extract from the Constitution of the Surf Casting & Angling Club of WA (inc) clause 15 - Paragraph 5:  
Any committee member who is absent from six consecutive Committee Meetings without leave of absence or other satisfactory reason, shall forfeit position held within committee.

### Presidents Comments

Well, our last month of activities has really been a great one with good attendances, and a lot of happy little Vegemite as a result, thanks to all our club organisers.

The Bluff Creek field day, at the beginning of March, was a beauty, with 33 in attendance, which proves its popularity and it didn't let us down fish-wise either. A total of close to two hundred kilos, which was spread around amongst most of the anglers. The Salmon were there, skippy were patchy, herring were very Spartan, and a variety of other fish to keep us all happy. Weather was from one extreme to the other, with thunder and lightning thrown in for good measure. A very "together" venue which was highlighted by the gathering at lunch time on the Sunday, and I know everyone enjoyed this prime social time. A top outing, and thanks must go to Ian Cook, and Darren Batchelor for their organisation.

Our Social organiser Phil Brayne, along with our Dry Casting Officer, Hans Wytenburg, organised a night cast/Social evening at the Holmans residence on March 14<sup>th</sup>, and this was as close to a perfect night as you could wish for. They organised the weather, the barbie, the drinks, and the casting superbly and there wasn't a hick-up all night, and I personally didn't hear one complaint (which is a change). Saturday night was a bonus as well, as most stayed till late in the evening and the attendance was very good, considering it wasn't advertised to the fullest.

Congratulations go to Phil and Lea Brayne, on the arrival of a healthy baby boy. All are doing fine.

A few of our club members are having a bit of a rough trot of late. Basil Marsh and his wife have both been spending time in the hospital, and we hope that they are both on the mend. Kit Thorgerson has had a few setbacks but true to form, she is getting the upper hand. Eric Parkers mother has a spell in the hospital also, but is well on the mend from my last report. I learnt at the night cast/barbie that Dave Anticich hasn't been enjoying the best of health since Christmas, but even though he wasn't too chipper, he and his family still made it to the cast night. To all the Surf Casters, I extend best wishes for a speedy recovery.

The April meeting looks like being a busy one as we have a couple of matters to consider, and also have to verify the field day venues for the next season. Have a look at these before the next meeting so you can have a positive outlook so that the venues, etc may be dealt with expediently and with thought. Don't forget to bring your favourite BEACH fishing rig to help with the instruction period.

At the time of this writing this report, a number of members are getting ready to represent our club in the State Boat championships. Thanks to Alan Brayne, and two ex-club members (who have since re-joined) in Steve Sutton and Heath Holman who have made their boats available, we are able to give it a go. Steve's boat is a 38 foot ex cray boat and will take 6 members and he has gone to a lot of trouble to help us. We wish our boys well for this event.

At the last General Meeting, I had the pleasure of welcoming Bretton Stitfold into our ranks and we hope he enjoys what our club has to offer. Next month it is the King Families turn. Also noticed at the last General meeting was Vernon D'Silva, (from the boat show), hope to see more of Vernon in the future.

New nominee, Cary Paddick was present and looking forward to seeing Cary again.

See you all at the last Dry Cast for this competition year on Sunday 5<sup>th</sup> April. Come along, enjoy the morning and, more importantly, learn.

George Holman.

## **BEACH FISHING**

Australia is fortunate in possessing some of the finest beaches in the world, and with them, excellent fishing. The ever changing formation of our beaches due to natural forces provides both shelter and food for a variety of fish. By learning to "read a beach, you can locate all the popular angling species such as Tailor, Salmon, Flathead, Mulloway, Trevally, Dart, Bream and Whiting.

### **THE GEAR SUCCESSFUL SURF FISHERMAN USES:**

As in all fishing, the correct rod and reel combination will dictate the degree of your success. The golden rule is to fish as lightly as possible. The lightest line, sinker, and rod/reel as the conditions dictate. Try not to anchor your bait to the bottom with a big sinker. A bait that is moving with the surge of the wave and tide action helps find a lot more fish.

### **THE ROD:**

A beach rod must have an action that lets you cast a heavy sinker or lure if the conditions demand it. By the same token the action in the tip section should be light enough to cast lightly weighted baits, and to "feel" the bite. The tip action will also enable you to hook and play a fish without placing too much pressure on the line. The range of Aussie made Snyder Glass rods is made with these very features. The rod can be made of either hollow fibreglass or carbon composite and must be from 3.5 to 4 metres long and preferably one piece. (New glass to glass ferrules have improved the action of two piece rods) For an Alvey reel the design of the rod is all important. The reel should sit about 20 cm up from the butt and the first or stripping runner should be approximately half way along the rod. Any closer will restrict the cast. To bring the line closer to the finger guiding the line on to the reel, and Alvey open runner serves the same purpose as an ordinary runner by controlling the line when fishing, and also prevents the line cutting your fingers when playing a fish. When you are ready to cast, simply slip the line out of the open runner. Place it back in for the retrieve or fighting a fish.

### **THE REEL:**

Why are anglers who use an Alvey Reel more successful? It's not just luck, they are using the right reel and an Alvey makes all the difference. If you are casting a bait with a heavy sinker, spinning with a lure, or more importantly, bait spinning with little or no lead, the versatility of an Alvey reel can't be bettered. The fast, direct line recovery lets you keep up with a fish if it runs towards you and the controlled winding will keep the line tight. The minimum of moving parts in an Alvey, and their simple design compared to other reel types, make them almost maintenance and trouble free, especially with the corrosive wear from sand and salt.

### **THE LINE:**

There are a number of advantages in using as light a line as possible that the conditions allow. You can cast further, feel a bite a lot better and it is less noticeable to fish. An excellent line for beach fishing is the Platypus brand in breaking strains from 4 to 8 kg. The lighter line for Bream, whiting etc. and the heavier sizes for Tailor and the larger fish such as Mulloway.

### **RIGGING AND BAITING:**

The surface feeding fish that move into surf gutters such as Tailor and salmon feed mainly on small baitfish. Baits such as WA and Blue Pilchards, Gar, White and Frogmouth Pilchards are the best bait for these fish. Strips of fish flesh can be used in the same manner. The most efficient way to use these baits is on a chain or gang of linked hooks. The number and size of the hooks used depends on the type and size of your bait. For Gar you can use up to a 5 hook rig in #4/0 or #5/0. WA Pilchards usually require a 3 hook rig in the same hook sizes. Small White Pilchards or similar bait fish need smaller hooks, from #3 to #1/0. You can purchase rigs already made to suit, or make your own. They are made by using a hook that you can open the eye on (Mustad 4200, 7766, 8260 or 3407A. Eagle Claw 6041T). The shank on all the hooks must be bent upwards slightly. This is to allow the bait to sit straight on the rig. Hooks with the eyes opened and bent are available (Mustad 4202, Eagle Claw 6043T). The correct way to bait your rig is to place it alongside the bait and align the point of the first hook with eye of the bait. Note the spot on the side of the bait where the last hook rests. Insert this hook first and continue with the others in sequence. The first hook should now go through the bait's eye socket. The fish that take a fish bait usually have sharp teeth that can cut through line, so some trace is needed. Wire traces are not needed and do tend to scare fish. A simple trace of heavier nylon is all you need. About 1 metre of 15 to 20 kg line is sufficient. Platypus make a special clear trace line that is excellent for this purpose. The smaller fish such as whiting, Bream and Dart, that feed in the shallower surf zone naturally need smaller hooks. A #3 to #4 for Whiting and Dart, a #1

April 1998.....Page # 5  
to #2/0 for Bream, preferable in a French or Beak pattern which tend to be finer and sharper. If you want a super sharp hook, use any of the chemically or laser sharpened models that are now available. The bait to use for these fish can vary; pipis and worms can be obtained right on the spot. Bream and Flathead can't resist a White or Frogmouth Pilchard rigged on a small gang of hooks. The most important step when rigging, is to use 2 swivels (as small as possible) and run the sinker on a short section of line between them. The top swivel, the one closest to the rod tip is the major eliminator of line twist.

### **READING THE BEACH:**

As the weather changes, so do the beach formations. A successful surf fisherman knows this and with experience learns to read the beach and surf conditions and fishes accordingly. There are high and low tide gutters. A gutter that produces good fishing on high water can be almost dry on the low. Conversely, a gutter than can be fished at low tide can be increasingly difficult to fish as the tide makes. The surf fisherman must be able to select a likely spot by assessing the conditions, state of the tide, and the existing structure of the beach formation.

### **DEFINING SURF GUTTERS:**

A surf gutter is formed by an outer submerged sand bank running parallel to the beach. Variable in length, the channel in between can have an outlet at one or both of the ends. Long featureless gutters are not as productive as smaller, shorter or narrower ones. Holes are formed at the gutter's outlet to the sea. Waves breaking on the outer bank, spread a layer of foam and broken water across the inner channel. Referred to by fishermen as white water, this disturbed water offers cover to fish and stirs up the bottom exposing food. The ideal gutter is one that is narrow enough to allow the angler to cast to the outer bank and bring his bait back through the deeper water of the channel. This is known as bait spinning and is best done with a fish bait and as little lead as possible. A sand spit forming inwards from the outer bank. This creates pockets in which fish congregate to feed. If you have to use extra weight to reach these spots, keep it to a minimum.

Fish will often be found where a gutter empties to the sea. The surge of water in and out, stirs up the sand and with it food. Position yourself near the mouth and allow the bait to drift with the run from the gutter. Potholes are the small indentations which form in the shallower water, often near the edge of the beach. Anglers often wade through them, not knowing that they can offer some good fishing. Whiting, Dart and Flathead actively feed in this shallow water, so it often pays to try these areas before disturbing them. Dawn and dusk are usually considered the best times to fish the beach, but often good fishing can occur during the day if the conditions and gutter formation are right. Fishing at night can be done during moonlight conditions when it is easier to read the water. Often good gutters can be picked during the day and returned to at night, when the conditions are more suitable for fishing.

### **METHOD:**

Now you have equipped yourself with a balanced rod and reel outfit, and have selected the right spot to start fishing, how do you go about catching some fish? As mentioned before, the species of fish you are chasing will dictate the tackle and bait to use and where to cast. Fishing for Tailor needs a long cast to the white water breaking into a gutter. As the bait lands and you turn your reel around to the retrieve position, give the bait a short, sharp flick to make it break the surface before it sinks. This often attracts feeding fish and provokes a strike. Keep the line tight with a slow and steady retrieve, occasionally lifting the rod to impart an action to the bait. When a fish hits, you will feel distinct bite. Sometimes the fish will take the bait and move toward you. A sudden slackening of line will be the sign of this happening. In this case, lean back on the rod to increase the retrieve rate to set the hook. Keep the rod high to take the weight of the fish, but always be ready to let the fish take line if it decides to make a dash seaward. Fishing for other species on the shallower water of pot holes and gutters requires the same slow rewind to keep the line tight.

**LUREFISHING:**

The use of the lure to catch fish on the beach is an exciting method. Tailor, Salmon, Flathead and even the occasional Dart or Bream will take lures. Tailor and other fish which feed out wide need a lure that will carry the distance. In these conditions a metal lure weighing anywhere from 25 to 90 gms is needed. They take the form of chrome spoons such as the Toby design, the Wilson Big T and stainless flashback Spoons. Lead bodied lures such as Juro Lasers, have a strip of prism tape to add flash, and give you a lure with maximum weight with minimum bulk to help you attain a distance. Another popular design is the sliced chromed metal type, one of the original lure patterns. To get the best results when spinning, you need a fast retrieve. The Alvey 700C and 650GRC models have the best line recovery for spinning the surf and a drag to handle the heavier strike you will get on a lure. The smaller you go in spool size the slower the retrieve and the less effective. You do not need a sinker when using lures, however the addition of an extra swivel in the form of a snap swivel to connect the lure to the line will help alleviate the increased line twist that comes with spinning. Try to cast to the edges of Tailor schools. Often the lure continually being pulled through the school can alarm it. Give the lure an erratic action by working the tip of the rod as you retrieve. The fish of the shallower water such as Flathead will take a lure. A smaller spoon or minnow pattern lure is ideal. You don't need the fast retrieve you use on Tailor. A steady but still erratic retrieve is all you need. Again move carefully when wading, so you don't frighten the fish. Start at one end of the gutter and cover the water in a series of casts before moving on a short distance and doing the same.

Club Secretary requires information on fishing locations anywhere around the coast so club members can have all relevant information to these places.

## Info required

- |  |                       |                       |
|--|-----------------------|-----------------------|
| 1) Area  | 2) Distance           | 3) Camping facilities |
| 4) Type of Fishing   | 5) Where to fish      | 6) Fish Species       |
| 7) Beach conditions  | 8) Is water available | 9) Nearest garage     |
| 10) Directions on how to get there and a map of the area would be handy. |                       |                       |

The above information is to be used to formulate a booklet of fishing venues that members can reference when going fishing. Your help in putting this book together would be greatly appreciated. If you have any queries regarding the above please contact me on 9359 2737.

**APRIL 1998 GENERAL MEETING**

**WHERE:** M.Y.A.S.G. Club Room at Inglewood Aquatic Centre Alexander Drive  
**WHEN:** Wednesday 8<sup>th</sup> April 1998 at 2000hrs  
**INSTRUCTION:** Rig selection. Bring your favourite beach fishing rig. There will be a discussion on they application, design and merits. You will gain some useful knowledge which you can apply to improving you own catch rates.

**APRIL FIELD DAY**

**WHERE:** CAPE TO CAPE  
**WHEN :** 18<sup>th</sup> April to 19<sup>th</sup> April. THIS DATE IS DUE TO EASTER FALLING ON OUR NORMAL FIELD DAY WEEKEND AND THE STATE ESTUARINE TITLES BEING THE SAME DATE.  
**SIGN ON:** Saturday 1200Hrs Carpark at Dunsborough near bakery  
**WEIGH IN:** Monday 1000Hrs location to be set at sign on  
**BOUNDARIES** Cape Naturalist to Prevally Park or Prevally Park to Augusta river mouth. The choice will be made on weather conditions.

**MAY FIELD DAY** First field day for 1998 - 1999

**WHERE:** ROTTNEST ISLAND  
**WHEN :** 16<sup>th</sup> - 17<sup>th</sup> May 1998  
**SIGN ON:** At Caroline Thompson camping area 1230hrs Saturday  
**WEIGH IN:** At Caroline Thompson camping area immediately after the return of the bus from West End.  
**BOUNDARIES** The whole coast of the island.

**APRIL DRY CASTING**

**WHERE:** Yokine Reserve corner of Alexander Drive and Wordsworth Avenue  
**WHEN:** Sunday 5<sup>th</sup> April  
**EVENTS:** 112Gm, distance, 56Gm, distance, D/H accuracy, S/H accuracy

**LOCAL FIELD DAY FOR APRIL**

**WHEN:** 18<sup>th</sup> April to 19<sup>th</sup> April  
**SIGN ON :** Phone in sign on to F.D.O. by 2000hrs FRIDAY Night  
**LINES DOWN:** Saturday 1300hrs  
**WEIGH IN:** Sunday 1000hrs G.Holmans House. Scales will be available on his back patio. Weights must be witnessed by a adult. FD Money to be left with the scales in an envelope with your name. NO MONEY NO POINTS. Results to be phoned into F.D Officer by 2000hrs that night.  
**BOUNDARIES** South Mole to Mindarie Keys *excluding the Swan River*

**LOCAL FIELD DAY FOR MAY** First field day for 1998 - 1999

**WHEN:** 16<sup>th</sup> - 17<sup>th</sup> May 1998  
**SIGN ON :** Phone in sign on to F.D.O. by 2000hrs Friday Night  
**LINES DOWN:** Saturday 1300hrs  
**WEIGH IN:** Sunday 1000hrs G.Holmans House. Scales will be available on his back patio. Weights must be witnessed by a adult. FD Money to be left with the scales in an envelope with your name. NO MONEY NO POINTS. Results to be phoned into F.D Officer by 2000hrs that night.  
**BOUNDARIES** South Mole to Mindarie Keys *including the Swan River*.

## SURFCASTERS MASTERS FISHING RULES

1. SURFCASTERS MASTERS WILL BE RUN UNDER CURRENT CLUB BEACH FISHING RULES.
2. THERE WILL BE 3 DIVISIONS:-
  - DIVISION 1 SURFCASTERS JUNIOR MASTER.
  - DIVISION 2 SURFCASTERS MASTER.
  - DIVISION 3 SURFCASTERS GRAND MASTER.
3. ALL FISH FOR DIVISIONS 1 AND 2 MUST BE WEIGHED IN ON CLUB FIELD DAYS.
4. FISH FOR DIVISION 3 MAY BE CAUGHT AT ANY TIME BUT YOU MUST HAVE A WITNESS TO THE WEIGHT AND ALL ENTRIES MUST BE PRESENTED WITH A CLEAR PHOTOGRAPH OF THE FISH AND A OBJECT OF KNOWN SIZE TO THE MASTERS RECORDER.
5. A FISH CAN ONLY BE USED TO CLAIM ONCE.
6. FOR DIVISION 1 FIVE [5] OF THE EIGHT [8] NOMINATED SPECIES MUST BE CAUGHT TO BECOME A JUNIOR MASTER.

## ROTTNEST FIELD DAY IN MAY

This is a real humdinger of a field day so try to come along.  
There was a write up about Rotto a couple of months back in Reel Talk

There will be a discussion on Rotto on gear to bring, facilities, fishing etc at the April general meeting. Remember first in best dressed. Those who pay early will have a guaranteed spot.

I would like to thank all those who put in submissions for the 1998 -99 field day venue list. The committee has after taking into consideration a number of points, come up with a good list covering most of the concerns of members. We would like to vote them in block at the April meeting.

The Bluff Creek field day was one of the best attended field days this year. The fishing was reasonably good. It was great to see a lot of interaction between members. Those of us who stayed an extra day had really good trevally fishing.

Congratulations to Lee and Phil on the new addition to the family

### Social Report

Hi all,

I would like to begin my report this month, by thanking all the people that turned up for the Night Cast social evening on March 14<sup>th</sup>. I was worried that we might not get many, in the way of attendance, as I was too late getting promotion for the evening into the last Reel Talk. I need not have worried, we had well over 40 people turn up, lots of kids, which was great. We had a barbecue and a few drinks, Easter eggs for the kids, then got into the night casting, when the sun had gone down. A lot of laughs were had, jokes were told, and drinks were drunk. (my personal bottle of scotch didn't last too long, thanks to Ian Mascarenhas and Cookie).

Bob Henderson won the day, or should I say night, closely followed by the previous night casting winner, Roy Killick (Did I spell your name right Roy?) Pete Stoekle got third. AGAIN. Good on ya Pete. I thought it was a great night, and once again, thanks to George and Kaye Holman, for the use of their patio area. These nights seem to always draw a good crowd, and they are a lot of fun, so you can be assured another will be on the cards, in the not too distant future (weather permitting).

For those that were not at the last general meeting, I am organising another Mystery Bus tour, for those that don't know, this is where you go out for the night, but don't know where the hell your going to. I have done the numbers on a few destinations, and as always, the cost is the main factor, but rest assured I will do the best deal I can. The rest of the committee gave me Saturday night, the 9<sup>th</sup> of May, as the desired date, but, the cost of everything on a Saturday night is dearer than on any other day of the week. (wages I guess) so I have taken it upon myself to shift the tour to Friday night, the 8<sup>th</sup> of May. I am sure the committee will let me know if this is not suitable. I haven't finalised everything yet, I will have all the details (except the location, of course) for you in the next Reel Talk.

Don't forget the Dinner Dance is looming again, the 27<sup>th</sup> of June to be exact, which is the last Saturday in June. Please, give this evening your time. This is our clubs "Grammys" if you like. If you have achieved anything at all during the year, then this is where you will be recognised for it. If you haven't broken any records during the year, it doesn't matter, come along give a clap to those that did, have a meal and a lot of dancing. Music supplied by one of the best musicians in Perth, Bill Shephard. Bill was the musician at our last Dinner Dance, and I had no hesitation in booking him again for this year. I will do my utmost, to get the best price I can for this night. I will keep you informed as it gets closer. See you all there.

The \$20.00 dollar note that you all have a crack at winning, when you come to the general meetings, has been put on the shelf for a while. I have had a 50 number spinning wheel made. (I feel like plucka duck) The object, is to purchase a number up to 50, at a cost of \$1.00 each, buy as many as you want.

The wheel will be spun and the winning number ticket holder will collect \$20.00. Or, if he/she is game, forfeit the \$20.00, and have a spin of the wheel, they will then win the monetary value of the number they spin up. (30 chances to win more than the \$20.00 you have already won, and 20 chances to win less, its your call.) A little fun, and member participation. We had the wheel at the last meeting and it worked well. We also took it to the Night Cast. Peter Stoekle won and took the \$20.00, opting not to spin again, (wimp). Eric Parker won the next spin, and was a man, and spun again, he picked up \$36.00. I should mention Darren Batchelor, at the general meeting though, he won the \$20.00 spin, took his chances at another, and walked away with \$4.00. (sucker.) Only joking, guys, its just a bit of fun.

Ok that's all from me this month.. give you details on the Bus tour and Dinner /dance next month....  
Tight whatever. Phil Brayne.

**NOTICE OF MOTION**

(11 MARCH 1998)

**To be added to Dry Casting rule 3.1.8**

**“DISTANCE CASTING”**

**On all club day casting distance events only monofilament fishing line is to be used. Braided line can only be used on any club open event.**

**Proposed - B. Henderson.**

**Seconded - I. Cook**

**NOTICE OF MOTION**

(11 March 1998)

**Replace 2.5.3 UNDERSIZED FISH**

**Should any competitor weigh in one or more undersized fish the penalty will be the loss of 20 points per fish presented for that venue.**

**Proposed - George Holman**

**NOTICE OF MOTION**

(11 March 1998)

**“DEFINITION OF MUTILATED FISH”**

- ⇒ **Any damaged fish that is still capable of swimming shall not be deemed ineligible for weighing in.**
- ⇒ **Any fish rendered incapable of swimming through mutilation (ie bitten in half by a shark) is not eligible for weighing in.**
- ⇒ **Any fish beheaded or having a fillet removed shall be deemed ineligible for weighing in.**

**Proposed - George Holman**

**This is in no way to be confused with the gutting and gilling required for fish to be presented for weighing in.**

## **SURFCASTERS** **SPECIES BADGE**

Hi Surfcasters!

To those of us that think we are, and to those of us that are aiming to be.

We present a new "Species Achievement Badge" for all members to prove and improve your ability to fish.

This badge will be known as :-  
"SURFCASTERS SPECIES BADGE"

It will run concurrently with our other competition "Surfcasters Masters".

All members old and new are eligible.

Duration in which to achieve the award is 24 months.

State minimum lengths apply.

- Surfcasters Species Badge to be run under current club beach fishing rules.
- Club recorder will be responsible for tabulating your entries which are to be entered on a new appropriate entry form.

List of Species:

1. Whiting (all)	7. Flat Head
2. Herring	8. Garfish
3. Tailor	9. Snook or Pike
4. Skippy	10. Flounder
5. Tarwine	11. Mulloway
6. Pilch	12. Salmon

Angler must catch ten species from this list to qualify.

### KALBARRI HOUSE VACANCIES

APRIL     18<sup>TH</sup> - 25<sup>TH</sup> APRIL

MAY        2<sup>ND</sup> MAY (all)

JUNE       1<sup>ST</sup> - 30<sup>TH</sup> JUNE

### A.A.A. OF WA REPORT

There were 24 delegates present at the March meeting of the above, George Holman and Hans Wytenburg represented our club.

It was pointed out that a recommendation was put to the Minister of Fisheries Monty House by R.F.A.C. to reduce the take of Mahi Mahi from 4. A letter is to be sent from the Association approving this move as they are quick growing fish and hard to target.

A letter is also to be sent to Gin-Gin Shire, the health department querying the ruling on the camping or staying out over night of anglers. A lot of comment was made by a few delegates who seem to pop of the woodwork when they have a problem and then handball the problem to the Secretary or Association!!

Comment was also tabled about the Minister's ruling of dropping the take of Bonito from 40 to 8. Most agree with it as it was pointed out that the North Mole would have had 3000 anglers fishing for them each weekend.

The boat championships looked like having a good entry of 200 competitors and the boat group had done a sterling job of organising the event. The weather forecast was the only problem.

Dry Casting Group the meeting at Kaye & George Holman's Home, 89 Clontarf Street, Sorrento on Wednesday 30<sup>th</sup> March at 8PM. Anyone interested in casting please attend.

The committee is making a list of members that would like to be able to be contacted by other members for various reasons eg - Fishing trips out side of club field days, arranging to travel together on field days.

If you would like to be on this list please complete this form and return it at the next meeting.

### Fishing venues for 98/99

Fishing Venues selected by committee for 98/99. Please peruse venues list. To be voted on at next meeting.

MAY	ROTTO <i>FIXED VENUE ALWAYS WELL ATTENDED</i>	NOVEMBER	CERVANTES TO HILL RIVER <i>THE MOST POPULAR VENUE, ALWAYS WELL ATTENDED</i>
JUNE	(LWE) BREMER BAY AREA <i>NEW VENUE DILLON BAY, FOSTERS BAY</i>	DECEMBER	LOCAL <i>INCLUDE NIGHTCAST &amp; BBQ - LINES UP AT NOON - WEIGH IN / BBQ AT 5:00PM</i>
JULY	YANCHEP <i>FISH TOGETHER CLOSE BOUNDARIES</i>	JANUARY	PRESTON BEACH TO MYALUP <i>THE MOST POPULAR VENUE USUALLY WELL ATTENDED</i>
AUGUST	ROTTO <i>THE MOST POPULAR VENUE</i>	FEBRUARY	LANCELIN TO WEDGE ISLAND <i>COMMITTEE'S SELECTION</i>
SEPTEMBER	MOORE RIVER <i>COMMITTEE'S SELECTION</i>	MARCH	(LWE) BLUFF CREEK <i>THE MOST POPULAR VENUE ALWAYS WELL ATTENDED</i>
OCTOBER	(SEPT LWE) WAGOE <i>A.A.A. COMPETITION IF IT GOES AHEAD</i>	APRIL	PREVELLY PARK TO AUGUSTA <i>THE MOST POPULAR VENUE</i>

◆

A STALL ON BEHALF OF THE CLUB HAS BEEN ORGANISED BY ANDY WOODFORD AT THE 4X4 & CAMPING SWAP MEET ON SUNDAY 5<sup>TH</sup> APRIL 1998 BETWEEN 9:30AM - 2:00PM.

PLEASE CALL ANDY ON 9401 4503 IF YOU HAVE ANY 4X4, CAMPING OR FISHING GEAR OR IF YOU HAVE ANY QUERIES ON THIS MATTER.

ALL PROCEEDS TO GO TO THE CLUB.

The thoughts and best wishes of the members of the Surf Casters and their families go out to Tony Holland and Trudy Hardy. Tony has suffered from a stroke and will be in hospital for a few months.

### S.C.A.C. Recorders Report

For Mar/Apr. 1998

**Hello Members,**

I have received an entry for the open section 2 from Phil Brayne, we were in Kalbarri when quite a few of attended the field day at Bluff Creek.

You would have observed that the sections 4,5,7,10,12 and 14 are still to be taken and there is still another month in this competition year, so go for it

to get back to basics I have compiled a page of useful Rigs that is in this issue.

#### OPEN COMPETITION ENTRIES

SECTION	MEMBER	WEIGHT	L/CLASS	LOCATION
1. Most Meritorious Fish				
2. Heaviest Shark 4.5kg Min	P. Brayne	6.600kg	8kg	Kalbarri
3. Heaviest Mulloway 3.5kg Min	M. Head	7.200kg	10kg	Kalbarri
4. Heaviest Salmon 3kg Min				
5. Heaviest Dhufish				
6. Heaviest Tailor	D. Anticich	5.900kg	20lbs	Wagoe
7. Heaviest Samson				
8. Heaviest fish S/H Rod Giant Trevally (4kg line class)	R. Niciejewski	2.750kg	3kg	Mack. Isl.
9. Heaviest Pink Snapper	H. Wytenburg	4.500kg	40lbs	Kalbarri
10. Heaviest Tarwhine				
11. Heaviest Mackerel	H. Brayne	25.00kg	20lbs	Quabba
12. Heaviest Trevally (S) kg min				
13. Heaviest Trevally (N) 1kg min	Mark Farney	7.950kg	20lbs	Kalbarri
14. Heaviest Snook/Pike				
15. Heaviest Scale fish 2kg min other than sections 2 thru 14	M. Head Baldchin Groper	7.300kg Pot Alley Gorge	6kg	Kalbarri

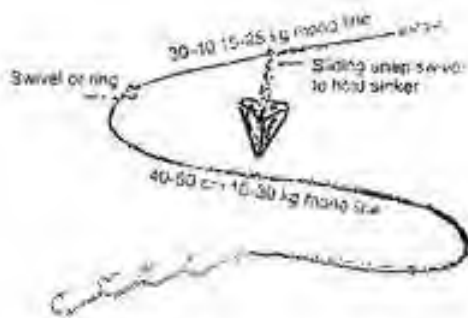

As we draw to the close of another very competitive year. I would like to request you to think seriously of nominating for the position of Club Recorder, as I will not be in a position to continue due to my work commitments. It is very interesting and I have improved my knowledge in fishing a great deal.

Till we meet Tight Lines and Good Luck with your fishing.

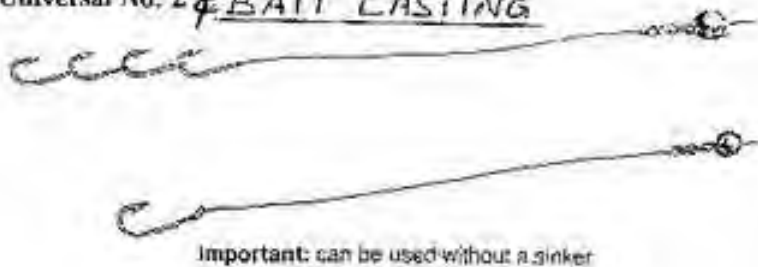

Ian "MACCA" Mascarenhas.

# Rigs for Popular Species

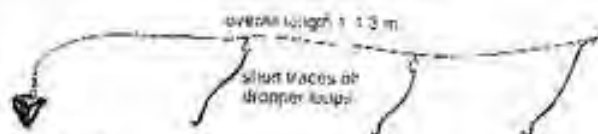

Universal No. 1

Universal No. 2 **BAIT CASTING**

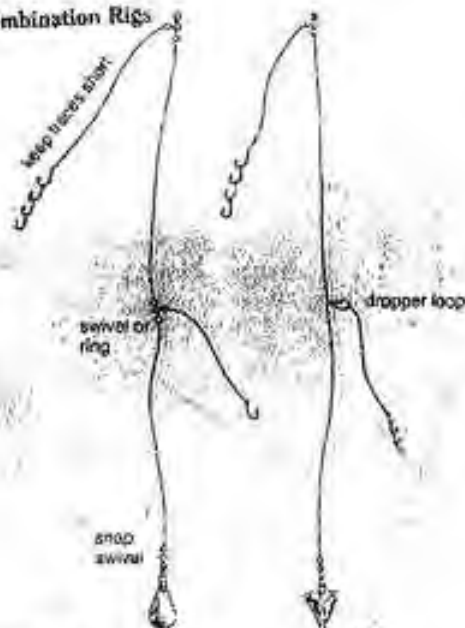

Note - many prefer Universal No. 2 as a standard wing rig.

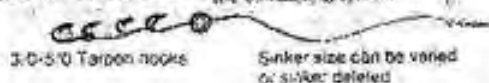

Notes on this Rig

1. Long shanked hooks are gaining in popularity mainly because of the ease of unhooking. Whiting swallow the bait quickly and this often means a fish hooked just down in the throat.
2. The bait must sit well on the hook, a stringy piece of sand will induce lots of bites but no hookups if it's hanging off the end of the hook.
3. As with all angling, good fresh bait will outfish others convincingly.
4. The somewhat heavy sinker helps in leading the fish.
5. Whiting experts suggest that ochre is best for the best bait for sand and yellowfin whiting.

Combination Rigs

SURFACE RIG - LARGE FISH the baitcasting system

ESTUARY LIFT RIG

Notes on this Rig

1. The importance of good quality whitebait must be emphasised. Fortunately in WA we have ready supplies.
2. Hook gangs should fit neatly on the whitebait. A No. 4 Tarpon is a good standard.
3. Handle flathead with care - they have sharp spikes on each side of the head capable of lacerating a hand when a fish thrashes about.
4. Vary sinker weights depending on depth, with the bait travelling just above the estuary bottom.

BLACK BREEM RIG

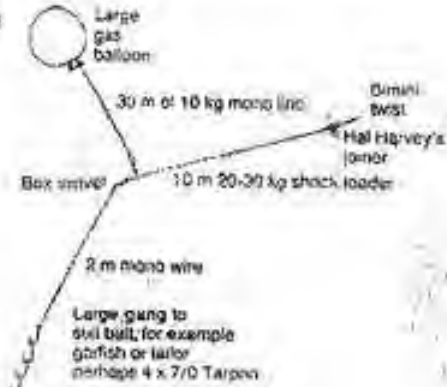

Notes on this Rig

1. Opinion is divided on the most suitable breaking strain line, especially for the trace. Some argue that light line encourages bites, others that too many big bream are lost to the snags and pylons where the fish are found. Conditions must be taken into account; in open water 3 kg is sufficient but if there are plenty of obstructions, go up to 7 kg.
2. Bait is the most important single factor in catching bream. There are few other types of angling in which the fish has such time to closely inspect the bait and "taste" it in the manner of a bream. So bait quality is paramount.
3. Bream are more likely to be shy than aggressive. Loud noise around the usually still waters will surely result in scaring the timid fish.

**BOAT RIG**
